Boost Library Maintenance Program
Memorandum of Understanding
Version 0

Program

This Memorandum of Understanding is intended to explicitly outline what's expected of library maintainers. By adopting a library, maintainers agree to provide sufficient resources to achieve the following:

- Resolve tickets in a timely manner.
- Support users via email and IRC.
- Merge pull requests when appropriate.
- Support the release team during release preparation.
- Ensure tests pass on all supported platforms.
- Maintain documentation, ensuring it's up-to-date and accurate.

Exiting the Program

In the chance that maintainers can no longer provide adequate resources required to maintain their library, we ask that they provide a 30-day notice, so that other maintainers can be found.   If libraries are not being maintained as outlined above, the program administrator also reserves the right to transfer library maintenance to another party, with a 30-day notice.

Feel free to sign, print, and date a copy of this MoU for your records.
